

At CureSearch our remembrance ceremony during the CureSearch Walk has become a very signature part of our events and we would love to continue this tradition. As we continue to push forward research and improve the odds for children battling cancer we want to make sure that we always take time to remember and honor those who we have lost. Remembrance ceremonies are very personal and each community should feel free to customize this part of their event. Please reference the CureSearch Script for the general procession of this event.

Suggested Remembrance Activities

- Balloon Release
- White Rose Presentation to those who are there remember a child they have lost
